

Tekdata has extended its range of high temperature cables into a variety of special formats.

Cable designs for high voltage, low or zero hal, with screening options can be configured to suit the application.

Power wires screened from overall screened signals

High temperature IDC interconnect

APPLICATION	TEKDATA'S SOLUTION
HYBRID CABLE WITH POWER WIRE SEGREGATION	An inner screen around the central cores provides EMC immunity. An overall screen protects the signals.
IDC ASSEMBLY	Tekdata high temperature, low/zero hal options.
300 MILLIKELVIN	See also Tekdata's range of Cryoconnect cable assemblies capable of operating within a vacuum.
HIGH VOLTAGE CABLE	Double Jacketing gives up to 4.5 kv jacket options.
AWKWARD ROUTING	See also Advanced Cable Systems
